

Produktdatenblatt

ECO Fresh-Clean

Concentrated maintenance cleaner. Suitable for all water-resistant floor coverings, coated and uncoated. Leaves a lightly glossy, dirt-repellent and durable protective film that can be polished to a high-gloss finish.

A product specially developed to meet modern cleaning and floor care requirements. Suitable for all water-resistant floor coverings, whether coated or, in particular, uncoated (PVC, linoleum, natural and artificial stone, rubber, and epoxy resin). Forms a lightly glossy, dirt-repellent and durable protective film that can be polished to a high-gloss finish.

Areas of Application

Suitable for all washable floor coverings such as plastic, PVC, linoleum, PU, natural and artificial stone, rubber, and epoxy resin.

ECO Fresh-Clean can be used in various ways:

- As an economical product for damp mopping
- For intensive cleaning and maintenance
- For use in automatic scrubber dryers

Application Instructions

Damp mopping:

Add 0.5–2 dl to 10 litres of water. Apply the cleaning solution evenly to the floor using a damp mopping system, allow a short contact time, remove the dirty solution, and let the floor dry. Polishing will enhance the protective film to a high-gloss finish.

Deep cleaning and initial treatment:

Use undiluted or diluted 1:1 with water.

Automatic scrubber dryer:

Add 0.5–2 dl to 10 litres of water.

Special Notes

Not suitable for unsealed wood or cork floors.

Follow the recommended dosage instructions. Correct dosing reduces water consumption and water pollution.

Dispose of contents/container in accordance with local, regional, national, and international regulations.

The manufacturer accepts no liability for damage caused by improper use.

Technical Data

Shelf life: At least 2 years

pH value: Concentrate: 8 / 1% solution: 7
