## ECO Sani-Power

For taps and fittings, sanitary porcelain, chrome, stainless steel, wall tiles, shower fittings, and similar surfaces. Cleans, deodorizes, and removes limescale in a single operation.

An excellent cleaner for the entire sanitary area. Quickly and effortlessly removes limescale deposits, urine scale, and other soiling. Cleans, deodorizes, and leaves surfaces fresh and hygienic.

### Areas of Application

Suitable for use on acid-resistant:

- Tiles, Taps and fittings
- Sanitary porcelain
- Chrome. Stainless steel
- Plastic surfaces, Washbasins, Stoneware
- Rubber and rubber-studded floor coverings

### Dosage

For large surfaces, depending on the level of soiling, dilute **40–160 ml in 8 litres of water**.

For stubborn or heavy soiling, use a higher concentration or apply undiluted if necessary.

Follow the recommended dosage instructions. Correct dosing reduces water consumption and water pollution.

### Application Instructions

Clean taps, washbasins, and other surfaces using a sponge or cloth moistened with water. Rinse thoroughly with clean water afterwards.

For larger areas, apply the cleaning solution evenly. Treat stubborn deposits with a cleaning pad.

Remove the solution using a wet vacuum or floor squeegee and rinse with clean water.

Suitable for both manual and machine application.

### Special Notes

Do not use on limestone-based surfaces such as slate, travertine, Solnhofen stone, marble, or terrazzo.

Check enamelled surfaces and glazed tiles for acid resistance before use.

Pre-wet acid-sensitive grout with water before application.

Dispose of contents/container in accordance with local, regional, national, and international regulations.

The manufacturer accepts no liability for damage resulting from improper use.

### Technical Data

Shelf life: At least 2 years

pH value:

Concentrate: 1 / 1% solution: 2.5

### Ingredients:

Organic acids, surfactants, fragrances, colorants, water.
